Indiana sustainability Development Program 2021 Indiana Climate Fellow – PSG Energy Group

Who We Are
PSG Energy Group serves clients with transparency and simplicity as we explore energy solutions and sustainability measures. We never stop learning, passionately pursuing technological developments to share with our clients. We exchange knowledge and take the time to coach, teach and mentor fellow employees, partners and clients. We communicate openly and operate collaboratively with all stakeholders, in order to design and implement the best solution for each client’s unique needs. PSG Energy Group is a part of a larger family of companies through the Envelop Group. This partnership enables us to provide a suite of comprehensive facility services for a wide range of energy reduction and offset projects.

Summary of the Project Development Engineer Intern: The Fellow will be responsible for performing analysis to qualify project leads and post installation performance. With assistance, he or she will perform tariff research, utility bill analysis, financial modeling and project performance monitoring and analysis. He or she will also gain exposure to design, engineering and construction of PV systems. The intern exposure will also include business development and operations tasks on a case by case basis. During the internship he or she will learn to communicate the potential for utility spend savings and develop an understanding of energy solutions.

General Duties:
• Facilitate, develop and complete analysis related to leads and project qualifications
• Gain a strong understanding of utilities serving PSG customers and sales targets
• Perform utility analysis for PSG leads and targets
• Perform project financial modeling
• Monitor active PV sites, analyze and present Project performance
• With guidance, recommend performance and monitoring improvements
• With guidance, qualify leads and contribute to PSG pipeline strategy
• Attend the Boot Camp May 17-21, 2021

Qualifications
• Ability to establish and manage relationships within and outside of an organization
• Strong analytical capabilities
• Strong written and verbal communication skills
• Ability to prioritize work and balance multiple projects
• Excellent decision quality and command skills
• Passion for Renewable Energy and Sustainability

Compensation
Compensation will be in the form of a scholarship through the Indiana Sustainability Development Program. The Fellow will work full time for 10 weeks, beginning in late May, and ending no later than mid-August 2021.

Feedback and evaluation
The Fellow will be given regular feedback from staff on progress and performance. Success in the fellowship will be determined by the completion of specified projects in a professional and timely manner. The Fellow should learn how a city identifies its sustainability priorities, effective principles of communication, and how to develop and maintain professional relationships.

Application instructions
To apply for this position, complete an application on the Sustain IU website. If you have questions about the program or any of the positions available, email Danni Schaut, ISDP Program Manager, at danmcphe@iu.edu. Applications will be accepted on a rolling basis (first come, first serve) until Friday, Feb. 19, 2021.

This job description shall remain fluid and will be reviewed on an as needed basis.
